

At the dental office of Dr. Jeff Rodgers', the health and well-being of our patients and team members has always been of utmost importance. We understand the concerns and uncertainty surrounding the Coronavirus (COVID-19) and are committed to being responsive to the needs of our community as the situation evolves and more information is provided.

We want to inform all our patients that we are continuing to see patients and reassure that we are taking all the necessary precautions recommended by the CDC and local health agencies in the area. In a small, controlled environment such as our offices, it is easy to quickly and swiftly implement new emerging protocols as those recommendations become available. We will continue to monitor the situation as it evolves. We will keep you updated on any changes and continue to provide a safe, healthy and relaxing environment.

We do request that any patients with symptoms associated with COVID 19 (fever, cough, difficulty breathing, etc.) or who have been in close contact recently with anyone with these symptoms to please notify us so that we can reschedule your appointment. For those patients who fall into a higher risk category (elderly or pre-existing conditions) for severe responses to COVID-19 who would like to reschedule their appointment, we please ask that you notify our office as soon as you have made this decision. Our goal is to provide the top-level customer service and care you have come to expect from us, and we want to guarantee we have the appropriate staffing to do so. We will also be practicing social distancing (such as not shaking hands) as a means of decreasing possible transmission of COVID-19.

We appreciate your effort in helping our community limit the spread of this disease. For more information about the COVID-19, visit <https://www.cdc.gov/>. In the meantime, we hope you and your family are healthy and look forward to seeing you soon.
